

**DO YOU PLAN TO OPEN FAST-FOOD BAR OR SHOP AND YOU HAVE NO PROPERTY?**

## **THIS OFFER IS FOR YOU!**

Mobile modular pavilions are an innovative and future solution. Their advantage are the ease of installation and removal, the ability to change the location, any size and extension- through combination of several modules. Our facilities feature a high level of aesthetics and modern design, which attract the attention of customers.

### **TECHNOLOGY THAT GIVES YOU UNLIMITED POSSIBILITIES**

Mobile modular pavilions are an innovative and future solution. Their advantage are the ease of installation and removal, the ability to change the location, any size and extension- through combination of several modules. Our facilities feature a high level of aesthetics and modern design, which attract the attention of customers.

## **REVOLUTIONARY ALTERNATIVE TO STATIONARY STATIONARY DINING**

Our offer is for people interested in opening a catering bar or commercial shop, companies which expose their products on exhibitions and companies need social pavilions

### **MOBILE BUSINESS**

Offered pavilions give you the opportunity to become owner of mini restaurants, bars, shops and other premises. Many people invest in stationary local, and when it turns out that at a given location the sale is not satisfactory, their dreams of success does not come true. Think of solution- your bar or shop working summer at the beach, winter in the mountains and the rest of the year near the shopping mall in one of the big cities, and you earn a full year! Dreams of success can become real, you just develop a good plan.

## COMMERCIAL PAVILIONS adjusted to customers needs

Produced by us commercial pavilions are made from the highest quality materials. Construction of pavilions are made of steel square profiles. Covered with Aluminum sheets AL=1 mm thickness, doped outside with standard white color. Interior made of H17 stainless steel. Floor made of waterproof plywood, anty-slide floor finish in color that fits to tables. As a manufacturer, we are able to design containers, taking into account your individual needs. The size, materials used in production, exterior and interior finish are just some of the elements on which way you have the performance impact.
